

GR

GREEN RIVER

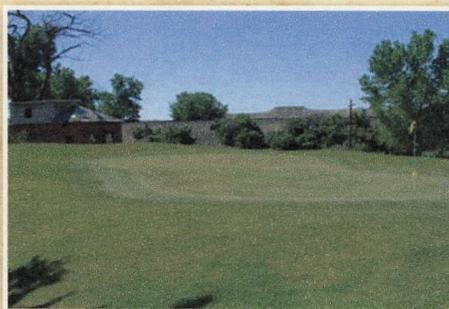

STATE PARK GOLF COURSE

Green River State Park Golf Course is a golf oasis on the banks of the Green River, with the Book Cliffs towering in the distance. The elevated tees and greens add character to a leisurely round of golf. The course offers fairways lined with mature cottonwood trees and water hazards from the meandering Green River. Surrounded by natural wonder, this nine-hole classic was designed to challenge the experienced player, but remain playable to beginners.

Hole # 5 lies adjacent to the Green River and lives up to the course's nick name 'Green on the Green'.

The green on # 3 is framed by an abandoned railroad building, the Union Pacific railroad bridge and accompanying tracks.

The golf course, the community and the surrounding area work together to create a relaxed 'small town' atmosphere.

GR

GREEN RIVER
STATE PARK **GOLF COURSE**

DESCRIPTION:

Nestled among mature cottonwoods, the Green River Golf Course is a relaxing nine-hole course that is defined by elevated tees and greens. Built on and abandoned river channel, the course has water hazards, sand traps and rolling mounds that give each hole a unique feel. From the blues, the course plays a respectable 3,243 yards and 2,996 from the whites. Though there is not significant elevation change, the course tends to play tight on a few of the holes defined by water and trees.

STATE PARK:

Green River State Park is an oasis on the bank of the Green River where tall cottonwood trees shade well-manicured lawns. The park is a favorite embarkation point for river trips through the Labyrinth and Stillwater Canyons and is a good base for seeing much of southeastern Utah. In addition to the nine holes of golf, Green River State Park is a gateway to many recreation spots and makes a great central base camp for outdoor adventures.

AMENITIES:

The Green River Clubhouse has a pro shop and can accommodate up to 24 for group outings. The State Park has 40 campground sites with hot showers, modern restrooms, a boat launch ramp and a pavilion that can accommodate up to 100.
